

SA1500P

Multifunctional indoor air quality monitor

CO2/CO/TEMP/RH

Introduction

Thanks for purchasing this Multifunctional indoor air quality monitor. This device is used to monitor the real-time concentration of Carbon Dioxide (CO₂) and Carbon Monoxide (CO) as well as the values of Temperature and Humidity. It will send audible and visible alert when user's health or life is under threaten.

This manual and its contents are only for the operation and use of this product and cannot be used for other purposes.

This manual and its content inevitably contain errors or discrepancies from reality, and are for reference only. If there are discrepancies or doubts, please contact our company.

The functions and specifications are subject to change without prior notice.

- ENTER Enter button

02 LCD Display

① Buzzer on/off

② Set alarm value

③ Manual calibration

④ Fan indicator

⑤ Unit for temperature

⑥ Set for date and time

Power on

Press and hold  to turn on and turn off the device.

- * During the warm-up process, high and low alarm points for CO₂ and CO will be displayed before the 40 seconds countdown.

Power off

Press and hold  to shut down the instrument.

Notice

When the backlight is OFF, press any key to light it.

Power lamp

In the process of charging, the green light flashes, and it is always on when it is fully charged.

Detection Interface

The detection interface shows real-time readings of CO₂, CO, Temperature, Humidity as well as the Battery Status Indicator and Time & Date.

Operation instructions

Alarm & Alert

When the CO₂ and/or CO level are/is higher than the lower alarm point, the yellow indicator will turn on, at the same time the gas name and the  will flash (indicating ventilation is needed)

When the CO₂ and/or CO level are/is higher than the high alarm point, the red indicator will turn on, at the same time the gas name and the  will flash (indicating ventilation is needed) and buzzer will sound when 

When CO level reaches its high alarm point value, the buzzer will sound even under mute status (buzzer is obliged to sound since human life is under threaten)

Operation instructions

Check MAX and MIN values

Under detection interface, press  in turn to check the Max and Min values of CO₂, CO, temperature and humidity in turn, along with time when these values recorded. These data are recorded from the moment when this monitor is powered ON to the present time scale.

Under detection interface, press  to check the Max values of CO₂, CO, temperature and humidity at the same time, as well as for Min values. These data are recorded from the moment when this monitor is powered ON to the present time scale.

Press  or no operation in 20 seconds, it will turn to detection interface automatically

Trouble shooting

When the device can't be turned on when battery has enough power, find the hole at the back side of the device and use a thin stick like toothpick to press the button inside, one press is enough.

Menu Setting

In detection interface, press **MENU** to activate the menu bar, press **▲** / **▼** to select each function, press **ENTER** to enter and save setting and press **↶|⏻** to quit and exit.

Set Buzzer

When  is blinking, press **ENTER** to mute the buzzer; when  is blinking, press **ENTER** to turn on the buzzer.

Setting

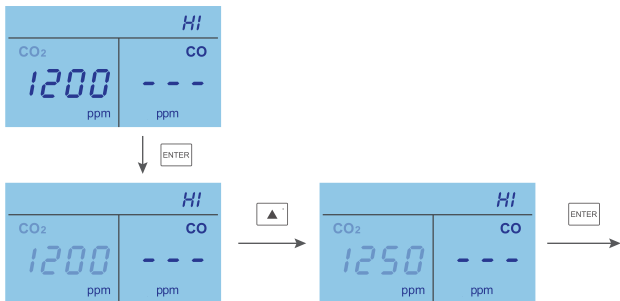

Set Alarm Points

When  is blinking, press  to enter alarm value setting interface, press  /  to select gas names CO₂/CO and alarm items HI/Lo, press  to enter alarm value setting interface, press  /  to adjust values, press  to save the setting.

Setting

for example

Calibration

Before calibration, fully charge this device and run it for at least 10 minutes in outdoor environment to reach an atmosphere with 400ppm CO₂ and 0ppm CO.

When  is blinking, press  to enter calibration interface. Press  /  to select among CO₂, CO, Temp and Humidity.

Setting

↓ ENTER

ENTER →

Calibrate CO₂: when CO₂ is blinking, press to start calibration, wait for 3-5 minutes till CO₂ reading is stable, press to finish calibration.

↓ ↑

ENTER →

Calibrate CO: when CO is blinking, press to start calibration, wait for 3-5 minutes till CO reading is 0, press to finish calibration.

↓ ↑

↓ ↑

To calibrate temperature and humidity, professional equipment and atmosphere are needed, please do not calibrate casually.

Setting

When  is blinking, press  to enter unit switch function (for temperature), press  /  to choose unit, press  to save the setting.

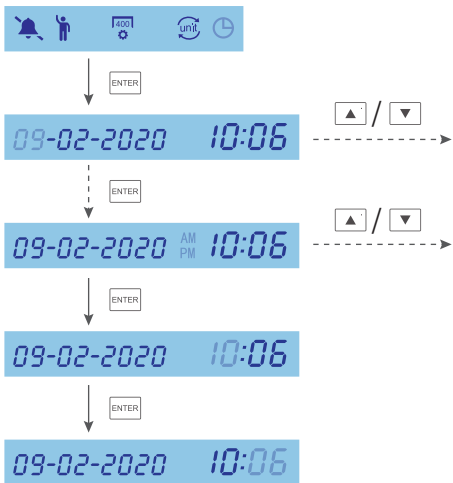

Set Time and Date

When  is blinking, press  to set time and date. Press  to switch each item and press  /  to adjust the digits. When the minute is well adjusted, press  to save the setting.

When AM and PM blink at the same time, press  to set the 24hour clock. Press  /  to make AM or PM blinking, press  to set 12hour clock.

Setting

Restore to Factory Setting

When  is blinking, press and hold **MENU** for 4 seconds to restore to factory setting. An audible chirp can be heard when it's done.

06 Specification Parameter

Typical test conditions: Ambient Temp: $23\pm 3^{\circ}\text{C}$,
RH=50%~70%, Altitude= 0~10 meters

Measurement	Specifications
Operating Temperature	32°F ~ 122°F (0°C ~ 50°C)
Storage Temperature	-4°F ~ 140°F (-20°C ~ 60°C)
Operating & storage RH	0-95%(non-condensing)

CO2 Measurement

Measuring range	(0-5000)ppm
Display resolution	1ppm (0-1000); 5ppm (1000-2000); 10ppm (>2000)
Accuracy	(0~3000)ppm: $\pm 50\text{ppm} \pm 5\%$ of reading (take the Maximum) (>3000)ppm: $\pm 7\%$ of reading
Repeatability	20ppm at 400ppm
Temp compensation	$\pm 0.1\%$ of reading per $^{\circ}\text{C}$
Response time	<2 min for 63% of step change or < 4.6 min for 90% step change
Warm-up time	<20 seconds

CO Measurement

Measuring range	(0-1000)ppm
Display resolution	1ppm
Accuracy	(0~50) ppm:5ppm (50~1000) ppm:Real value \pm 10%

Temperature Measurement

Operating temperature	32°F ~ 122°F (0°C ~50°C)
Display resolution	1°F / 0.1°C
Accuracy	\pm 2°F / \pm 1°C
Response time	<20 minutes (63%)

RH Measurement

Measuring range	5~95%
Accuracy	\pm 5%
Display resolution	1% Main interface display, 1% Max/Min display

Operating Voltage	DC(5 \pm 0.25)V
Dimension	120*90*35mm
Weight	190g

The USB cable is only used for power supply, not for communication with PC. If the power plug is disconnected or loose, the product may not work normally, and the LCD display information may be incorrect.

This product can't replace the CO2 detector in dangerous workplace, and can't replace the detector in human or animal health places, life and livelihood, medicine related fields.
